

Safe. Simple. Effective.

Con-Tech EcoWash™

AUTOMATIC WASH SYSTEM
GEN II

- Designed to minimize / eliminate need for drivers to climb up and down ladder (Keep them on the ground)
- Controls utilize manual ball valves to increase reliability and keep maintenance at a minimum
- 4 Strategically placed zones on rear pedestal and drum

NEW Valve Manifold

- Spray control manifolds are conveniently located for easy access
- Individual drain valve for each ball valve

Water Strainer

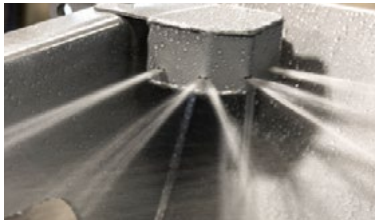

- 100 mesh inlet strainer keeps contamination from entering valves and spray nozzles
- Water drain valve located on strainer for additional freeze protection

Pump

- The cycle is powered by a dual diaphragm air pump that can supply up to 100 psi of washing pressure.

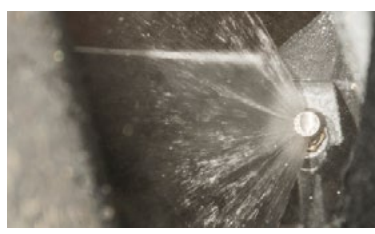

The EcoWash™ system was developed with *safety, reliability and ease of use* in mind!

ZONE 1 HOPPER

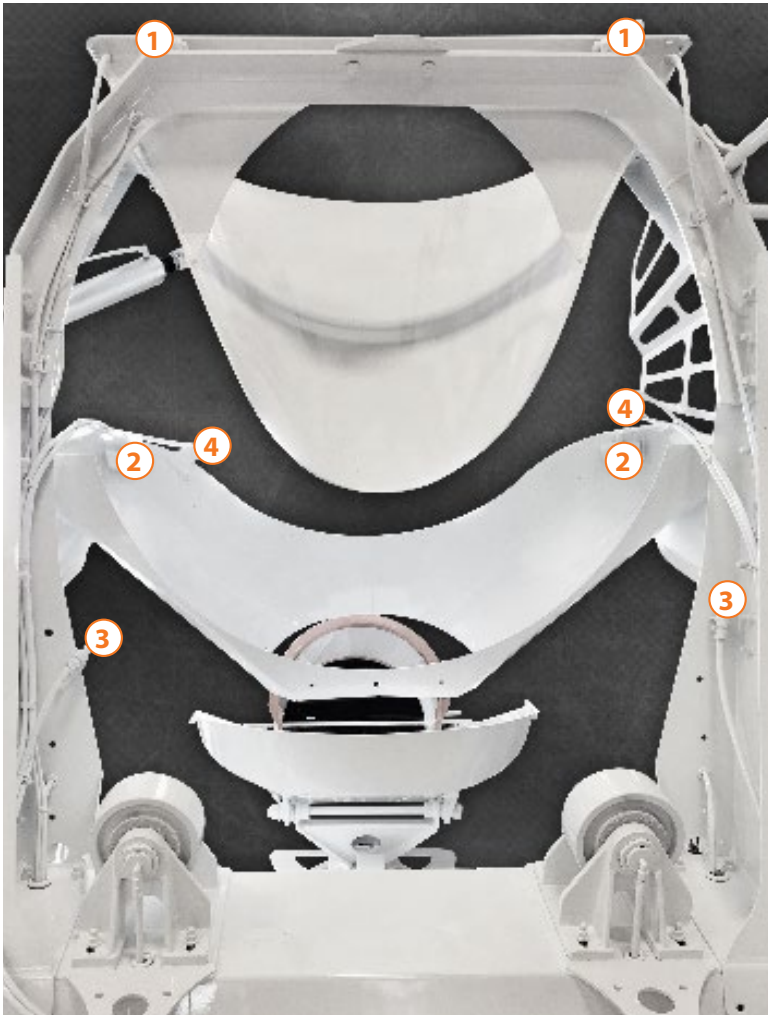

ZONE 2 COLLECTOR

ZONE 3 DRUM (EXTERIOR)

ZONE 4 DRUM (DISCHARGE FIN)
